Lighting Threads

Luminous threads in different dimension and color. We can provide various thickness and length.

CODE	DIAMETRE
EL-0.9	0.9mm
EL-1.2	1.2mm
EL-2	2mm
EL-3	3mm
EL-4	4mm
EL-5	5mm

COLORS

Power Sources

We offer solutions to light up your threads, from rechargeable battery to plug-and-play cable. All the batteries has different light effect as like as blinking and fixed light.

CODE	VOLTAGE	TYPE	HOUR	LENGTH
IN-AA	3V	2AA	72h	0-5M
IN-CR	1.5V	CR2032	2h	0-80cm
IN-USBC	5V	USB Cable	∞	0-5M
IN-USBR1	5V	Rechargeable	6-8h	0-5M
IN-USBR2	5V	Rechargeable	6-8h	0-10M
IN-WAT	3V	2AA	24h	0-5M
EU Plug	220	wall plug	∞	0-50M
IN-12V	12V	12V cable	∞	0-50M

Special Lighting Materials

Special Luminous materials

CODE	DIMENSION	DETAILS
PANEL	10x10cm	Luminous panel (available in different dimensions)
Custom STICKER	4mm	Luminous sticker with logo
Safety VEST	Unique Size	Safety vest with luminous panels
Floating ROPE	100M	Mooring rope

Floating Rope for mooring

Luminous Sticker logo

Safety Vest

Luminous Fendress

Luminous fendress in skuba fabric. Available in different colors and dimensions.

CODE	DIMENSION
CP-F0	F0
CP-F1	F1
CP-F2	F2
CP-F3	F3

Luminous Wind Breaker

Luminous wind breaker for high visibility sport. Available in different sizes.

CODE	DIMENSION
Jacket	S-M-L-XL
Gilet	S-M-L-XL

Nautical Kit

Kit with 2 meters of piping wire, 2mm thickness and 12V inverter.

Filati plastici luminosi

I nostri filati luminosi sono elettroluminescenti ricoperti da un cladding in pvc che conferisce il colore al filato.

Sono resistenti ad urti e a stress, completamente waterproof e certificati CE e RohS.

Ogni filato ha necessità di alimentazione, che sia una batteria o un cavo 12V.

Da evitare che il connettore, se non scelto appositamente stagno, entri in diretto contatto con l'acqua; mentre l'intero filato può essere immerso senza problemi.

Queste tecnologie sono l'ideale per la sicurezza in ambienti poco illuminati, come per esempio l'ormeggio notturno a gavitello o la visibilità in navigazione.

Oltre all'aspetto funzionale del prodotto, ne riconosciamo anche l'estetica per illuminare interni e cuscineria.

Possiamo fornire dei Sample Kit, composti da 1 metro di filato 0.9mm, connettore e batteria AA per testare il prodotto.

Ci occupiamo sia della commercializzazione della materia prima, sia delle personalizzazioni e delle implementazioni in loco.

Per quanto riguarda le cime, possiamo impiombare direttamente su richiesta il filato luminoso.

Luminous threads

Our luminous yarns are electroluminescent covered with a pvc cladding that gives the yarn its color.

They are shock and stress resistant, completely waterproof and CE and RohS certified.

Each yarn needs power supply, be it a battery or a 12V cable.

To avoid that the connector, if not specifically chosen watertight, comes into direct contact with water; while the entire yarn can be immersed without problems.

These technologies are ideal for safety in poorly lit environments, such as night buoy mooring or visibility during navigation.

In addition to the functional aspect of the product, we also recognize its aesthetics to illuminate interiors and cushions.

We can provide Sample Kits, consisting of 1 meter of 0.9mm yarn, connector and AA battery to test the product.

We take care of both the selling of raw material and the customizations and on-site implementations.

As for the ropes, we can directly splice the luminous yarn upon request.
